The IQ2500T top mount air conditioners are used to reduce heat accumulation within enclosures and maintain a safe operating temperature.

These units use closed-loop cooling technology, which removes heat without letting outside air into the sealed enclosure. All units feature a digital programma-

ble temperature controller with an alarm. The air conditioners feature a rugged 16 GA welded steel, dent resistant cabinet construction. The units have a space saving aesthetic cabinet design. The units are powered by an efficient, quiet and long lasting rotary compressor, with a CFC-free refrigeration system.

All units are factory tested and are designed to mount on the top of an enclosure, while maintaining NEMA 12 integrity. Units are ANSI/ASA 61 gray or brushed stainless steel.

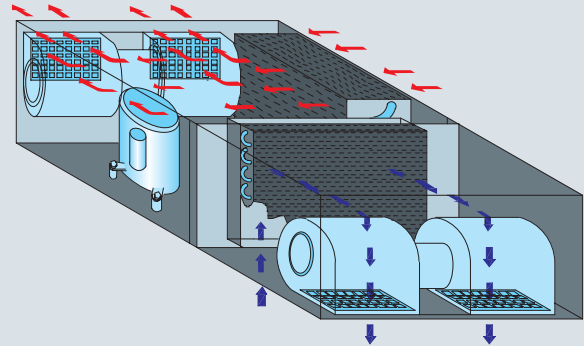

UL / ULc Listed
NEMA 12 / IP54

Steel units: NEMA 4 w/N4GK kit
SS units: NEMA 4X w/N4GK kit

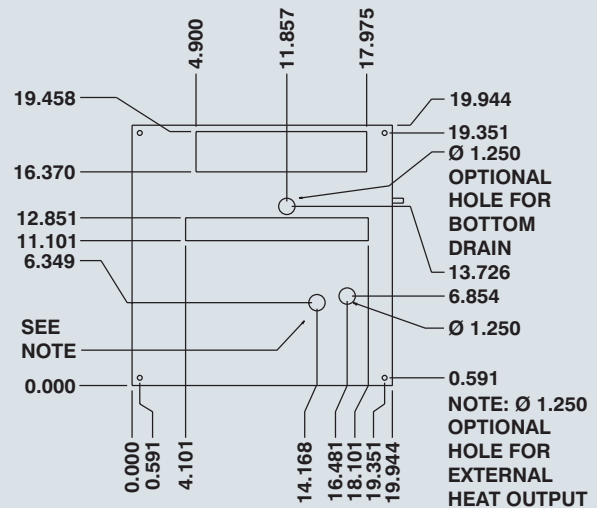

Unit shown above is custom-painted 'Jet Black'. Standard units are painted ANSI 61 gray or brushed stainless steel. Other custom colors, such as beige, are also available.
